THE China-Japan war, as we have endeavoured to forecast it and to follow they do now when referring to each Opening Cruise of the Royal Hongkong its course, has been regarded by us as other. It would perhaps be more in a noteworthy phase in the development keeping with the dignity of journalism, of modern civilisation. It is not necessary to dwell upon the causes which led up to the outbreak of hostilities between the Chinese and Japanese over the suzerainty or the internal condition of the Korean Kingdom. The Japanese Government seem to have taken some

pains to explain the reasons which led them into this war, while China has not considered it necessary or desirable to do so. Still, apart from these initial considerations, a state of war has resulted, and the two powers are now measuring swords in the presence of the entire world. Electricity and the newspaper correspondent now tond to invest every war with an international and universal importance, apart from formal treaties or other international understandings. As this conflict happens to be in 'Asia, and Great Britain possesses a preponderant interest in that hemisphere, the political bearings of this struggle may involve duties upon England of which the casual enlocker cannot take accurate note. But from the standpoint of Western observation the war may teach lessons

which are outside of those considerations which appeal to the interests of any special nationality. To our mind, the war now being waged between China and Japan is a duel between two nations upon which were supposed to have been grafted the improved methods of the West. For over thirty years these innovations have been popularly believed to have been in. The s. s. chips of a modern type have also been purchased, forts have been built, and guns of the most approved type have been secured. Military and naval instruction has been imparted to the Chinese by competent European officers, and an air of advancement and of adoptation to European methods has been given more or less to the Chinese services. Every effort of this nature

has, we are afraid, acted like the new patches upon the old garments and the new wine in the worn-out wine-skins. The Chinese official system of universal corruption has been coated over with a veneer of European novelties, and a large amount of the money spent in the veneering has been put into the pockets of the vast army of astute official rob-

bers to whom the empire of China now

owes its temporary discomfiture. Ja-

This is surely uncalled for :- Owing to the VON HANNECKEN BUMMONED TO victed, ro-appearance of the black-plague at Hongkong and Canton the Kanagawa Governor has informed the foreign Consult of his intention to despatch harbour-police officials to inspect vessels arriving from the places.

In spite of the war, though it will no doubt be a little damped by it, observes the Chinese Mail (Wah Tsz Yat Po), the sixtieth birthday of Her Majesty the Empress Dowager of China, which falls on the 7th instant, will be celebrated by the officials in Canton in an imposing style. All the yamons have decorated arches erected in the front, and on that day the various officials, dressed in state, will proceed to the Man Shan Temple to offer their congratulations and respects, while theatrical performances will take place inside the Temple for their entertainment. Nor is the spirit of enthusiasm less in Hongkong. As will be seen from an advertisement in to-day's issue, of our Chinese contemporary the Tung Wa Hospital has obtained permission from the Government for the patriotic Chinese to make lantern shows, to play music, or to fire crackers on that day. The Hospital | very much if the event comes off now, see-Committee urge their compatriets to make ing that the Japs are so busily engaged in the occasion one of general rejoicing. The medicine shop in which the fire originated—it is not known how—is insured for \$4000 with a Home office for which Messrs Butterfield and Swire are the agents. ### AN EVICTION AT THE PEAK
